Your 1928 Garden— Make it Better Than Ever Before.

Seasonable conditions have been such that the outlook for gardening has never been more promising.

Nature has done her part, and now it rests entirely with yourself as to what success will follow your efforts during the forthcoming seasons.

One essential factor is good seeds, and those offered in the following pages are the best seeds of the very best strains.

Searl's Sovereign Seeds will assist you in solving most of your garden problems, and ensure for you, under ordinarily favourable conditions, a garden as lovely and as profitable as the one you have so often admired.

Our statement is substantiated by seventy years' satisfactory service with an exacting Australian public. It is therefore no idle boast for us to assure you that our seeds will ensure your garden doing its best—an unceasing display of blossoms rivalling in charm your wildest dreams, and a wealth of luscious wholesome home-grown vegetables all the year round.

Play fair both to yourself and your garden by demanding Searl's Sovereign Seeds, and thus reap the maximum reward for your time and labours.

TERMS OF BUSINESS

ORDERING, ADDRESSES, Etc.

When giving orders, send name and address in full, with directions as to route, and to whose care goods must be consigned. Please use the Order Form in this Catalogue.

WE CAN SELECT FOR YOU.

When the choice of varieties is left to us, we select the most desirable colours and varieties, all correctly labelled.

PLANT ORDERS.

All orders received are subject to the possibility of some plants not being in stock at the time. All varieties cannot be had at all times of the year. If we have not the varieties required in stock, careful substitution will be made. When customers do not desire this, they should add a few extra names for the purpose of enabling us to complete the number of plants ordered.

OUR PACKING.

We shall at all times see that goods are well and securely packed, but after despatching such goods our responsibility for any loss, damage, or miscarriage ceases.

CARRIAGE OF GOODS.

Retail orders for Vegetable and Flower Seeds (except heavy goods, such as Peas and Beans, either in packets or bulk) are sent **Post Free** to any part of the Commonwealth. The railage or freight on a rail or steamer journey for Potatoes, Plants, Flowers, Fruit Trees or Implements (either alone or as part of a general order) is charged to our client.

POSTAL CONVENIENCES.

The Parcels Post System is simple and economical for the despatch of Seeds, Plants, and Cut Flowers, and we receive very flattering testimonials as to arrival of Flowers and Plants in good condition.

LOST ORDERS.

Letters are sometimes lost in the post. If you do not get our reply to your order within a reasonable time, please send us a duplicate order, stating when and in what form order was sent, and sign the same name and address as in the first order, so that it may have immediate attention.

HOW TO REMIT.

By Crossed Cheque (on any Bank), Postal or Post Office Order, payable at Sydney. Small amounts may be remitted in Stamps: No receipt sent for sums of 2/6 unless stamp is enclosed to cover postage. Do not send coin in a letter.

SEARL'S Satisfactory Garden Service—Seeds, Plants, Flowers, Advice.

CREDIT.

To our established Customers, retail accounts are rendered monthly, but we expect prompt payment on receipt of account. Orders from unknown purchasers must be accompanied by a remittance, or a satisfactory Sydney reference.

All communications should be addressed to the Firm, at 397 George Street, Sydney, and not to individuals.

We want your business. No order too large or too small to receive personal and prompt attention.

Correspondence invited.

IMPORTANT.

DELAYS IN TRANSIT.

We feel that we cannot emphasise sufficiently the importance of customers not only writing their names and full addresses plainly, but acquainting us with the speediest and safest route, thereby reducing the risk of delay on perishable goods to a minimum.

Although all plants and roots leaving our establishment are carefully packed and in good condition, we wish it clearly understood that we cannot accept any responsibility relating to goods arriving in a perished or damaged condition.

Forwarding directions should therefore be made as explicit as possible in order to obviate any possibility of delay in transit.

To further facilitate matters we would also ask our clients to keep the ORDER PORTION of their letters APART from the CORRESPONDENCE contained therein.

SEARLS LTD.

CONDITIONS OF SALE.

We believe that all seeds, bulbs and roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this, we give no undertaking that such seeds, bulbs or roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We, further, give no warranty, expressed or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold on these terms, they are at once to be returned to us.

ROSES WE HAVE NOT LISTED

Should our Patrons require varieties of Roses which do not appear in our Lists, we will do our best to comply with their wishes.

ABOUT ROSES.

When in doubt concerning what varieties are best suited to your district, leave the selection to us, and we will choose the most suitable and satisfactory sorts.

CHARMING PLANTS OF RECENT INTRODUCTION

BOLTONIA LATISQUAMA (Perennial—

Beautiful daisy-like flowers of a pretty pink colour, borne on long stems in endless profusion.—2/- each.

NEPHROLEPIS SEARLI—

A new and distinct variety of Nephrolepis with beautiful, fine feathery foliage.—Price, 2/- each.

SCABIOSA COLUMBARIA — 2/- each.

An entirely new perennial Scabious that produces a continuous heavy crop of exceptionally beautiful flowers, which are quite different in form from those of the ordinary Scabious.

The blooms vary a little in colour, from a pale mauve pink to delicate lavender blue, and no lovelier colour can be desired for indoor and garden decoration.

The plants make strong, dwarf, sturdy bushes, and do not require to be staked in any way, and they produce large flowers on long, stiff stems in great profusion.

The flowers will be found of considerable commercial value, as they last a long time in water.

We consider this one of the finest and most beautiful perennials introduced for many years.

HIBISCUS (Giant Mallows)—

Hardy herbaceous perennial varieties, throwing up strong shoots 4 to 6 feet high in spring. The flowers are large, often over 6 inches across, and are produced freely through summer and autumn. They are moisture-loving plants, and thrive in rich deep soil. The foliage turns golden yellow before falling in late autumn. Cut back to the ground level each winter. Strong roots available from June to August; after that in pots.

Moscheutos Alba—Pure white, with crimson eye.—2/6 each.

Moscheutos Carminea.—Deep carmine pink.—2/6 each.

Moscheutos Coccineus.—Large rich crimson.—2/6 each.

GIANT FLOWERED VERBENA ("BRILLIANT.")—

A splendid crimson scarlet Verbena suitable for bedding purposes. A brilliant self coloured variety has been badly wanted, and this new "Brilliant" is well named.

It is a very strong grower and free flowerer, and the large flowers are a fiery crimson scarlet, and are sweetly scented.

The flowers do not burn in the sun, but keep their colour during the hottest weather; and for bedding effects this will be found one of the best varieties ever issued.—Plants in pots 1/- each.

IBOZA RIPARIA—

A beautiful dwarf evergreen flowering shrub, growing about two feet high, which converts itself in winter into one fluffy mass of delicate lavender-tinted flowers.

The plant, when in full flower, appears as a ball of lavender fluff in the garden.

This is a most charming acquisition to our winter flowering shrubs. Plant in sheltered position.

Its foliage is highly aromatic. Plants 2/6 each.

NEW HYDRANGEAS—3/- each.

Coguelecot—Deep red, fine striking colour.

Elmar—Lovely shade of bright pink. Very good.

Krimhild—Salmon rose, very brilliant colour.

Lanzelot—Lovely pink, edges of petals fimbriated.

Parzival—Deep red, the darkest red offered, flowers frilled like a Primula. A grand novelty.

Westphalenhind—Palest shell pink, enormous truss.

GERBERAS FOR GARDEN GAIETY

Gerberas have rightly been described as the "Aristocrats of the Flower Garden," and no flower is better entitled to such a distinction.

The brilliant, daisy-like flowers, embodying almost every conceivable hue, are borne on long, substantial stems, throughout the entire year.

SEARL'S SPECIALISE IN GERBERA PLANTS.

Our stock is subjected to an annual combing, and anything not quite up to our standard is thrown out. The result is that patrons purchasing their plants from us are assured of securing the cream of the cultivated varieties now offering.

Our plants are all outdoor grown, hardy, robust, and furnished with plenty of root, and our prices are certainly not higher, but in many instances lower, than others.

Secure yours now before the ground becomes too cold for transplanting.
